

## **Report on Activities of the Coalition of Alabama Inland Water Way Associations**

Make up and report on activities of the Coalition of Alabama Waterway Associations. Including in this will be final report of the Alabama Freight Mobility Study and report on the marketing activities of this study by CAWA. Also the tie in to economic development in Alabama by the water way associations will be included. The activities going on in each of the waterways and impact of stimulus monies received by the Corps of engineers will be part of presentations.

I believe in last couple of years CAWA's presentation was the only representation of commercial navigation for the conference.

Presenter and co-author:

Larry Merrihew or Billy Houston
